

Western Copper Corporation

REDSTONE | ENORMOUS POTENTIAL

SNAPSHOT

OWNERSHIP	100%
DEPOSIT TYPE	Sediment-hosted stratiform copper deposit
METALS	Copper and silver
MINE TYPE	Underground
LOCATION	Nahanni Mining District, NWT Claims and leases over approximately 160 km
STATUS	UBC project to study regional geology and identify area with good exploration potential

Based on Technical Report - August 2005

PROJECT OVERVIEW

The Redstone Project is located 290 km south of Norman Wells, Northwest Territories and comprises discontinuous claims and leases stretching over approximately 100 km in a northwest-southeast orientation.

Exploration camp

The Redstone Copper Belt is essentially an unmetamorphosed succession that is locally well exposed in an arcuate belt less than 15 km wide and about 300 km long. The inferred resource is located on the Coates Lake lease, which represents a small proportion of the total area of mineral rights.

Western Copper is currently working with the University of British Columbia's (UBC)

Mineral Deposit Research Unit to analyze this large land package in order to develop our future exploration plans.

RESOURCE

Class	Tonnes M	Resource Grade		Cu Eq %	Contained Metal	
		Copper %	Silver g/t		Copper M lb	Silver M oz
Inferred	34	3.92	9.0	4.0	2,940	9.8

Technical Report: August 2005 | Qualified Person: A.W. Gourlay P.Geo. | Cu Eq Metal Prices: US\$2.00/lb copper, US\$11.25/oz silver | 3.0% copper minimum assay intercept | No discount for metallurgical recovery contained in metal figures

CAUTIONARY NOTES

Statements contained herein that are not historical fact are forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are subject to risks and uncertainties which could cause actual results to differ materially from estimated results. **For US Investors:** SEC guidelines strictly prohibit U.S. registered companies from including certain terms, such as "measured," "indicated," "inferred," and "resources," in their filings with the SEC. U.S. investors are urged to consider closely the disclosure in the Company's Form 20-F.

Coates Lake

ACCOMPLISHMENTS

- ✓ Completed initial field portion of exploration program
- ✓ Commenced update of geological model and exploration plan
- ✓ Reviewed land package and dropped some claims

NEXT STEPS

CONTINUE EXPLORATION PROGRAM

- UBC to carry out 2010 field program
- Future exploration program to be developed based on UBC's results
